

SHUTGUN
SHUTS SPRINKLERS FAST

- One hand activation
- Cleaning cost reduction
- Fusible link ensures protection
- Ultimate excessive water damage control
- Sprinkler system operational again in seconds

ACCIDENTAL SET OFFS

A forklift hit's a sprinkler in a rack. Your employee decides to attach Christmas ornaments to a sprinkler. A machine malfunctions creating excessive heat. A child throws a ball, accidentally hitting a sprinkler. All these events may cause a sprinkler to activate, resulting in costly water damage. With the Shutgun at hand you can prevent excessive and costly water damage.

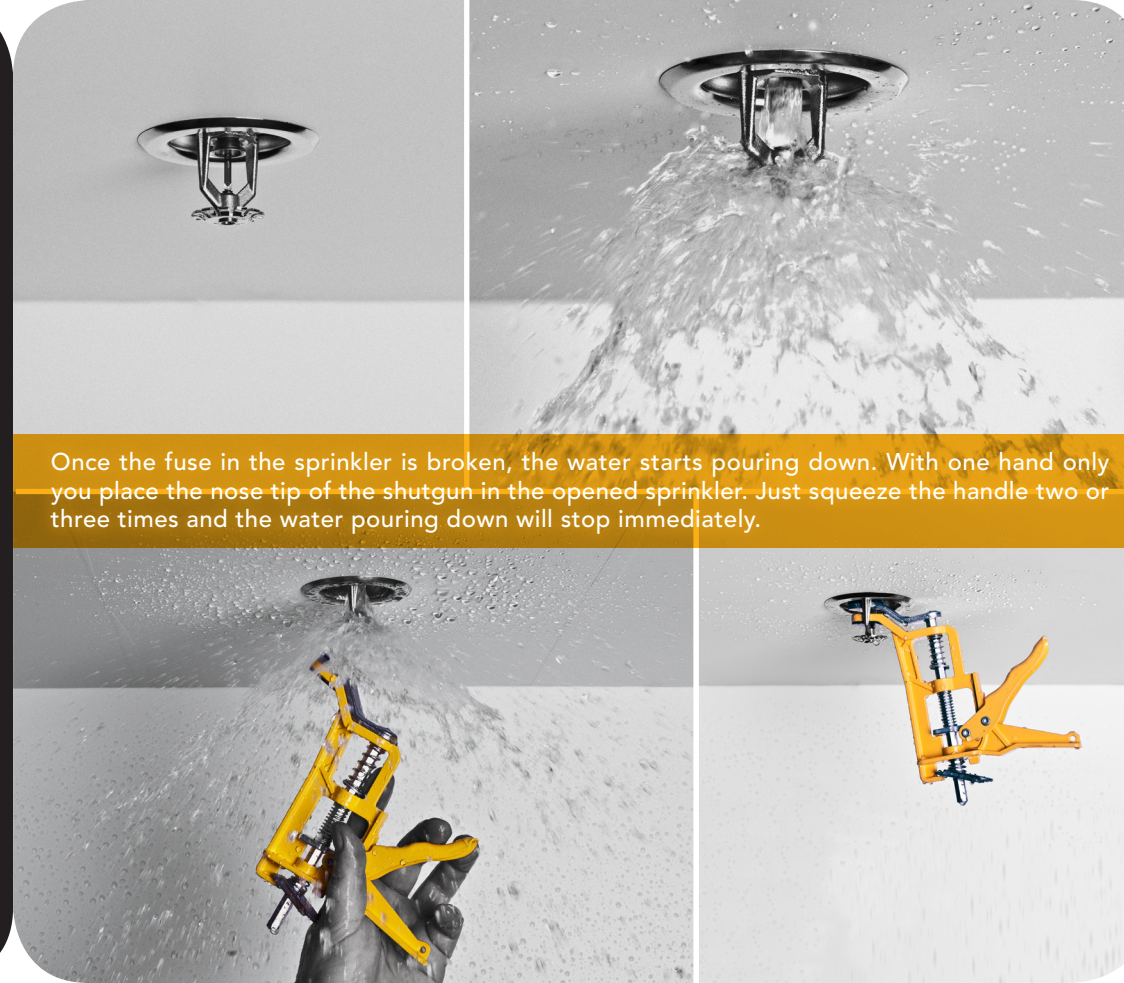

**THE FASTEST, EASIEST
AND SAFEST TOOL TO PREVENT
EXCESSIVE WATER DAMAGE**

- One hand activation
- Cleaning cost reduction
- Fusible link ensures protection
- Ultimate excessive water damage control
- Sprinkler system operational again in seconds

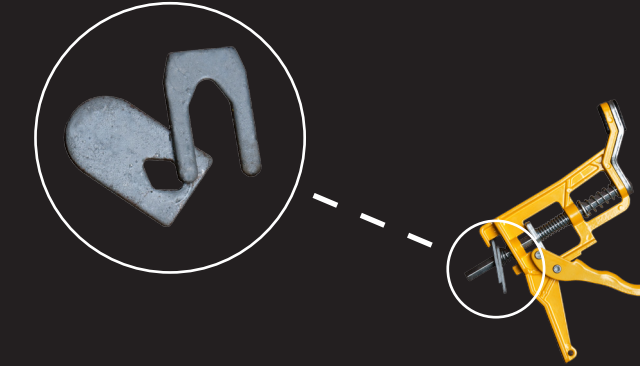

ACCIDENTAL SET OFFS

A forklift hit's a sprinkler in a rack. Your employee decides to attach Christmas ornaments to a sprinkler. A machine malfunctions creating excessive heat. A child throws a ball, accidentally hitting a sprinkler. All these events may cause a sprinkler to activate, resulting in costly water damage. With the Shutgun at hand you can prevent excessive and costly water damage.

Once the fuse in the sprinkler is broken, the water starts pouring down. With one hand only you place the nose tip of the shutgun in the opened sprinkler. Just squeeze the handle two or three times and the water pouring down will stop immediately.

SAFETY GUARANTEED!

The Shutgun is the smallest, easiest, fastest and safest tool available to stop activated sprinklers. It fits in your pocket and can be operated with one hand, leaving the other hand to stabilize yourself on ladders and such. Should a fire become hazardous after all, a fusible link will melt and release the tool to set off the sprinkler once again.
